Bug ID: BUG-001

Bug Title: Year Date Month format displays the generated date in the wrong format

Severity: Medium
Priority: Medium
Status: Open

Environment: Calendar Date Generator

Preconditions:
Calendar Date Generator page is open.

Steps to Reproduce:

1. Enter the number of dates as 1.
2. Select **Year Date Month hh:mm:ss** as the output format.
3. Enter start date as 01-01-2026.
4. Enter end date as 01-31-2026.
5. Click **Generate Dates**.

Test Data:

- Number of dates: 1
- Format: Year Date Month hh:mm:ss
- Start date: 01-01-2026
- End date: 01-31-2026

Expected Result:
The generated date should be displayed in **Year Date Month hh:mm:ss** format.
For example: 2026 19 January 19:31:03

Actual Result:
The generated date is displayed as:

2026 January 19 19:31:03

The application displays the date in **Year Month Date** format instead of the selected **Year Date Month** format.

Bug ID: BUG-002

Bug Title: Date is generated when the custom date range has a start date later than the end date

Severity: High
Priority: High
Status: Open

Environment: Calendar Date Generator

Preconditions:
Calendar Date Generator page is open.

Steps to Reproduce:

1. Enter the number of dates as `1`.
2. Select a valid output format.
3. Enter a start date that is later than the end date.
4. Enter the end date.
5. Click **Generate Dates**.

Test Data:

- Number of dates: `1`
- Format: `YYYY-MM-DD`
- Start date: `01-31-2026`
- End date: `01-01-2026`

Expected Result:
The application should validate the date range and display an appropriate error message indicating that the **start date must be before or equal to the end date**. No date should be generated.

Actual Result:
The application generates a date even though the **start date is later than the end date**.
